Our trained STEM volunteers can:

- Help advanced or disengaged students
- Work on projects and investigations with students
- Be a helping hand for practical work and theoretical content
- Run presentations/demonstrations on what they're studying at university
- Be a role model and mentor, sharing experiences of STEM at school and university
- Talk to students about their interests and future careers

97% of Host Teachers agreed that an In2science mentor was a good role model for their students, sharing passion, experience and knowledge of career pathways using STEM

Host Teacher : "Joseph [mentor] has been absolutely brilliant. Connects with students really well. Students genuinely interested in the science he learns and how it can be applied. They love his visits especially as he has been a past student and connects with their own experiences at this school."
